Simultaneous Localization and Mapping for 3D Reconstruction and Camera Pose Estimation

Guest Editor:

Dr. Linyan Cui

School of Astronautics, Beihang University, Beijing 100191, China

Deadline for manuscript submissions:

closed (20 September 2022)

Message from the Guest Editor

Simultaneous localization and mapping (SLAM) constructs a map of the surrounding world using data collected by the platform operating SLAM system and simultaneously localizes itself within the map. SLAM plays an important role in the computer vision and robotics field. The sensors used by the platform to observe the outside world can be various, such as monocular cameras, stereo cameras, RGB-D cameras, and lidar. These sensors can be divided into visual SLAM, lidar SLAM, multisensor fusion SLAM, and so on depending on the type of sensor. With the development of deep learning, semantic SLAM has been attracting increasing attention, especially in challenging environments, such as dynamic environments. Contributions addressing state-of-the-art developments and methodologies, as well as applications of simultaneous localization and mapping (SLAM) and perspectives on the future, are all welcomed.

Information Engineering,
Politecnico di Bari, Via Orabona
4, 70126 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
