Message from the Guest Editors

Dear Colleagues,

Technology is beginning to play a key role in cities' urban sustainability plans. A Smart City is managed with intelligent technologies which improve the quality of the services offered to citizens and make all processes more efficient.

This Special Issue aims to explore the topic of Smart Cities and the different artificial intelligence techniques that can be employed in the development of architectures for these cities or for the analysis of their data.

The topics of interest for this issue include but are not limited to:

- Smart city modeling and simulation;
- Smart mobility and transportation;
- Intelligent vehicles;
- Smart traffic system operations;
- Smart integrated grids;
- Intelligent infrastructure;
- Sensors and actuators;
- Open data and big data analytics;
- Smart health and emergency management;
- Smart environments;
- Smart education;
- Smart home and smart buildings;
- Smart manufacturing and logistics.

an Open Access Journal by MDPI

Prof. Dr. Eduard Llobet

Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), MEDLINE (PubMed), **Ei Compindex**, **Inspec (IET)** and **Scopus**.

CiteScore (2018 Scopus data): **3.72**; ranked 9/123 in 'Physics and Astronomy: Instrumentation' and 102/661 in 'Electrical and Electronic Engineering'.
