## Theory and Design of Vibration Sensing and Gyroscopic Systems

Guest Editor:

**Prof. Dr. Samuel F.  
Asokanathan**

Department of Mechanical and  
Materials Engineering, The  
University of Western Ontario,  
London, ON N6A 5B9, Canada

Deadline for manuscript  
submissions:

**closed (15 February 2023)**

### Message from the Guest Editor

This Special Issue is aimed at reporting new research directions for one of the most useful sensors to emerge this century. Vibratory angular rate sensors, also referred to as Coriolis Vibratory Gyroscopes (CVG), have found several engineering applications in inertial navigation and stabilization for military, aerospace as well as entertainment industries. Thus far, this class of sensors has made the most noteworthy use of the Coriolis acceleration (or its inertial force counterpart), originally observed by the French scientist Gaspard-Gustave Coriolis. Original as well as review articles in the areas of mechanics, component design, fabrication as well as testing are welcome. Research on structural configurations related to resonator design/fabrication, frequency tuning, characterization and other pertinent areas associated with both micro-scale (MEMS-based) as well as macro-scale sensors are encouraged.

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access** : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility**: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank**: JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
