Message from the Guest Editors

Dear Colleagues,

New wireless protocols and computing paradigms have allowed the Internet-Of-Things to assume a leading role in our society, feeding all services tailored to citizens and to the industry (e.g., Industry 4.0, eHealth, energy, and mobility and transportation).

IoT devices produce a huge amount of data that needs to be managed in large-scale and integrated infrastructures, featuring a continuous stream of information originating from embedded systems, going through digital platforms, and reaching final user applications.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
