Special Issue

The Advanced Flexible Electronic Devices

Message from the Guest Editor

Recent advances in materials and device technologies have enabled the fabrication of flexible sensors and actuators for applications in health assessment, medical diagnosis, intelligent robotics, human–machine interface, etc. The objective of this Special Issue is to provide wide coverage of research on the latest advances in flexible sensing and actuating technologies. The scope of this Special Issue includes but is not limited to:

- Flexible hybrid electronic devices;
- Implantable electronic devices;
- Paper-based electronic devices;
- Flexible e for soft robotics;
- Flexible sensors/actuators for human–machine interface.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
