

## Special Issue

# Sensors Technology and Social Media Data Mining

### Message from the Guest Editors

This Special Issue, entitled "Sensors Technology and Social Media Data Mining", examines the latest advancements, methodologies, and challenges in utilizing data mining techniques to analyze the vast amount of data generated by social media platforms. Additionally, this Special Issue highlights the emerging synergies between sensor technology and social media data mining, offering new avenues for extracting valuable insights.

- sensor technology
- social media data mining
- natural language processing
- sentiment analysis
- network analysis
- machine learning
- public health
- urban planning
- disaster management
- marketing
- privacy preservation

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
