

## Special Issue

# Wearable Sensing Technologies for Human Health Monitoring

### Message from the Guest Editor

This Special Issue aligns seamlessly with the scope of “*Sensors*”, exploring the intersection of sensor technologies and human health monitoring. Sensors play a pivotal role in the functionality of wearable devices, capturing and translating physiological data into actionable insights. This Special Issue will encompass a diverse range of sensor types, including but not limited to biosensors, pressure sensors, strain sensors, electrochemical sensors, and optoelectronic sensors, highlighting their integration into wearable platforms. By focusing on wearable sensing technologies, this Special Issue will contribute to the ongoing discourse on sensor applications in healthcare, promoting interdisciplinary research at the crossroads of sensor technology, data science, and healthcare innovation.

### Guest Editor

Dr. Jayraj V. Vaghasiya

Faculty of Engineering, The University of Sydney, Sydney, NSW 2006, Australia

### Deadline for manuscript submissions

closed (30 June 2025)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
