

Special Issue

Artificial Intelligence and Machine Learning in Engineering Sensing Applications

Message from the Guest Editor

Artificial intelligence (AI) and machine learning (ML) are rapidly transforming engineering sensing by enabling more sophisticated data analysis, predictive capabilities, and automated decision-making, leading to improved efficiency, reliability, and safety in various industrial applications. The potential areas of using AI and ML in engineering sensing include data pre-processing, sensor calibration and compensation, signal interpretation, and process optimization. This Special Issue is aimed at publishing articles representing state-of-the-art and future trends of developing AI and ML in engineering sensing applications that include, but are not limited to, machinery and structural health monitoring, sensor networks for environmental monitoring, and autonomous vehicles. Potential authors are invited to contribute in the form of original research, theoretical developments, experimental studies, and reviews of current status and future trends in the area.

Guest Editor

Dr. Biswanath Samanta

Department of Mechanical Engineering, Georgia Southern University,
Statesboro, GA 30460, USA

Deadline for manuscript submissions

31 October 2025

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
