Special Issue

Ultrasonic Imaging and Sensors II

Message from the Guest Editors

In view of the good reception of the first Special Issue "Ultrasound Systems and Sensors", with 13 high-quality manuscripts in different disciplines of the field, we are pleased to announce the launch of the second edition of this Special Issue. Ultrasound imaging is one the most extended diagnostic techniques in medicine, and one of the most demanded tools for non-destructive evaluation in industry. Although it is a well established technique, scientific and technical advances keep pushing the field beyond its frontiers. It is, indeed, an amazing research field, which involves topics varying from materials science for transducers manufacturing and wave propagation physics to high-end analog and digital electronics and signal and image processing algorithms. This Special Issue is open to new research and review papers in any of these fields, including, but not limited to:

- New materials for ultrasound transducers
- Transducer design for NDT and medical applications
- Physical acoustics
- Analog and digital ultrasound electronics
- New beamforming methods and imaging modalities
- New NDT and medical ultrasound applications
- Ultrasonic image processing and AI techniques

Guest Editors

Dr. Jorge Camacho

Dr. Linas Svilainis

Dr. Tomás Gómez Álvarez-Arenas

Deadline for manuscript submissions

closed (10 May 2025)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
