Advanced Intelligent Robotics and Autonomous Control Systems—Celebrating the 75th Birthday of Professor Imre J. Rudas

Message from the Guest Editors

This special issue serves as a testament to Professor Rudas's enduring influence and serves as a platform for scholars to reflect on his contributions, present cutting-edge research inspired by his work, and envision the future directions of the fields he has helped shape.

In the meanwhile, we extend our warmest congratulations to Professor Rudas on this milestone occasion. May this special issue stand as a fitting tribute to his exceptional career, inspiring future generations of researchers to continue pushing the boundaries of knowledge and innovation. The topics of this Special Issue include, but are not limited to, the following:

- intelligent systems and control;
- sensor networks and applications;
- applied artificial intelligence and machine learning;
- applied information technology in robotics;
- multidisciplinary applications of IoT;
- future perspectives and challenges of sensor technologies

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
