

Special Issue

Global/Local/Hybrid Structural Health Monitoring Technologies

Message from the Guest Editors

This Special Issue aims to establish a comprehensive platform for researchers, engineers, and practitioners by presenting the most recent and advanced SHM technologies, incorporating global, local, and hybrid sensing and data processing. The papers published in this Special Issue will provide valuable insights into state-of-the-art SHM technologies and the direction of research and development in the SHM field.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
