# Edge Artificial Intelligence and Data Science for IoT-Enabled Systems

## Message from the Guest Editors

The digital transformation of industry and society is being powered by the synergy of the Internet of Things (IoT), edge computing, and Data Science. This is a fundamental shift in how organizations create value, optimize operations, and address global challenges. The rapid data surge demands not only robust infrastructure but also smarter, autonomous analytical methods, making edge networks ideal for Data Science. Integrating the lifecycle of Data Science with edge computing, optimizing sensor data collection, analysis. and visualization, unlocks the potential for IoT devices to evolve from simple sensing to intelligent pattern recognition and autonomous decision-making. As IoT expands as a global data driver, Data Science becomes increasingly vital. This Special Issue invites original research and reviews on Al, edge computing, and data preprocessing for IoT-enabled decision-making, as well as mathematical concepts for improving IoT sensor systems. We also welcome submissions that perform comprehensive theoretical analyses of existing solutions by connecting the ideas and techniques of intelligent edge computing with other disciplines.

# **About the Journal**

## Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

#### Editor-in-Chief

### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

## **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
