Sensors for Physiological Monitoring and Digital Health: 2nd Edition

Message from the Guest Editors

In this Special Issue, we want to build a bridge between different scientific disciplines and offer highly innovative researchers in various fields a platform to exchange research in this exciting and emerging field: "Sensors for Physiological Monitoring and Digital Health: 2nd Edition". We, the of this Special Issue, represent research backgrounds in biomedical signal processing, health informatics, artificial intelligence, mobility research, and bioinformatics, focusing on biomedical applications and sports science. We stand for the highly interdisciplinary approach that is essential in research in this emerging scientific field and highly anticipate submissions from a broad range of specialties to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
