Application of Internet-of-Things Technologies in Precision Agriculture

Message from the Guest Editors

Precision agriculture is among the most essential Internet of Things applications. The Internet of Agriculture Things (IoAT) is a new route in agriculture that has seen tremendous growth. Agriculture is the key industry that will provide this huge population with food and support worldwide sustainable economic development. IoT, AI (Artificial Intelligence), and other cutting-edge technology have made agricultural processes more specialized and highly optimized. The optimization of agricultural practice efficiency through the use of the IoAT and sensor technologies not only saves resources but also can control environmental risks and economic sustainability. In this Special Issue, we anticipate many techniques on how IoT technologies might be employed to enhance data collection quality and precision agriculture. Some interesting subjects include, but are not limited to:

- Smart sensors for farming system
- Internet of Things
- IoT multi-sensors
- Sustainable agricultural system
- Precision agriculture using edge computing

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
