Challenges and Future Trends in Electronics for Wireless Sensing Technology

Message from the Guest Editors

In a world where electronics and sensing are pervasive, wireless technologies are a key aspect in the development of sensing platforms. The need to measure different physical and chemical quantities means that the use of multiple sensors must be carried out with as few wired connections as possible. Moreover, in a smart environment, environmental monitoring and sensing of factors such as pollution, food, and water quality can be integrated with advanced wireless communication technologies. This allows for the efficient collection of data sets, which can then be analyzed using artificial intelligence to monitor and analyze environmental pollution, thereby preventing health hazards to the general public. We invite cutting-edge theoretical and practical contributions on a wide array of topics crucial to advanced wireless sensing techniques, targeting researchers, developers, and practitioners from academia and industry alike.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
