Special Issue

Sensing Technology to Measure Human-Computer Interactions

Message from the Guest Editor

Sensors invites submissions for a Special Issue focusing on “Sensing Technology to Measure Human-Computer Interactions”. As technology rapidly advances, the ways in Ih humans interact with computers or new interfaces like virtual reality continue to evolve, creating new challenges and opportunities for sensor technologies. This Special Issue aims to explore innovative sensing solutions that enhance our understanding and measurement of human–computer interactions.

- sensor design
- physiological signals
- digital interactions
- machine learning
- gestures

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
