

Special Issue

Image Processing, Computing, and Learning for Immersive User Interface

Message from the Guest Editors

Due to advanced imaging and sensing technologies, various imaging technologies have been leading immersive user interface research as a new form of human computer interface. For instance, virtual reality or touch feedback-based user interfaces often require large image data as well as algorithms of image computing and processing to achieve natural interactions and realism. This trend has been found in numerous applications and fields such as medical and healthcare systems, sport training assistance, service and social robots, STEM education, car driver assistance, sensory motor rehabilitation, and entertainment. Hence, image processing, computing, and learning technologies can be applied for creating new forms of immersive user interface or leading to advance the state of the art. This special issue therefore aims to provide a platform for scientists and researchers all over the world to promote, share, and discuss various new issues and developments in the area of image processing and immersive user interface from fundamentals to applications.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
