

# Special Issue

## Trust in the Internet of Things

### Message from the Guest Editor

The Internet of Things (IoT) underpins most industries and businesses and has now entered people's homes. It allows the automation of tasks and monitoring of systems and people, and feeds the data needed by artificial intelligence applications. However, this widespread adoption of IoT is accompanied by many questions about the security, ethics, and privacy of such IoT systems. Since they significantly impact our daily lives, it is of paramount importance to increase their trustworthiness. This Special Issue is an ideal platform to report the more recent research advances in trust in support of IoT systems. We invite contributions with original research or review articles, which share new mechanisms, protocols, and architectures, present theoretical proposals, describe practical deployments, or identify new research opportunities. Articles may include, but are not limited to, the following topics related to trustworthy IoT systems:

- Security and IoT;
- Ethics and IoT;
- Privacy and IoT;
- Cybersecurity attacks of IoT;
- Secure conception and deployment of IoT systems;
- Blockchains and IoT;

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
