

Special Issue

Cloud and Edge Computing for the Internet of Things

Message from the Guest Editor

The Internet of Things (IoT) has revolutionized our interaction by connecting various devices and enabling seamless data exchange. As the IoT continues to evolve, the demand for efficient and ubiquitous Cloud-edge collaboration computing architectures becomes increasingly critical. This Special Issue aims to explore the intersection of cloud and edge computing within the context of the IoT, with a focus on virtualization, ubiquitous computing, and cloud-edge collaboration. We invite researchers and practitioners to contribute original research articles, case studies, and review papers that address the challenges and opportunities presented by cloud and edge computing for the Internet of Things.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
