

## Special Issue

# Inertial Sensing System for Motion Monitoring

### Message from the Guest Editors

There has been growing interest in wearable sensor technologies over the past decade, with these technologies being used in sports to monitor and measure athletes during training, competition and recovery. Athletes and coaches not only use this technology to measure their current performance, but also to show areas of potential improvements and to aid with recovery phases after an injury occurs. For detailed information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
