

Special Issue

Machine Learning Based Feature Recognition and Image Processing in Sensing

Message from the Guest Editor

Recently, we have seen a growing interest in the potential use of Feature Recognition and Image Processing. Feature Recognition (FR) is a technique to identify and extract application-specific information from input models for downstream engineering activities. Image feature recognition is an important area of artificial intelligence, aimed at recognizing targets and objects in various modes. Machine learning (ML) is a field of inquiry devoted to understanding and building methods that 'learn'. It is the method that leverages data to improve performance on some set of tasks and allows software applications to become more accurate at predicting outcomes without being explicitly programmed to do so. Benefiting from the excellent ability of feature learning, machine learning has achieved good results in the field of feature recognition. This Special Issue, therefore, aims to put together original research and review articles on recent advances, technologies, solutions, applications, and new challenges in the field of machine learning-based feature recognition.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
