

Special Issue

Two-Dimensional Materials Based Sensors

Message from the Guest Editors

Two-dimensional materials can be the building blocks for various type of sensors, such as photodetectors, strain/pressure sensors, gas sensors et. The two-dimensional-based sensors can be also enlarged by creating two-dimensional heterostructures. The two-dimensional heterostructures can be produced by combining 2D-2D, 2D-3D, 2D-1D, 2D-0D structures. This special Issue aims to introduce the two-dimensional materials with the combination of nano-fabrications. Topics in general include, but are not limited, to:

- Two-dimensional materials/heterostructures-based sensors: 2D material growth, transfer, fabrication, device prototype and demo
- Two-dimensional materials/heterostructures as photodetectors
- Graphene or other 2D materials-based strain/pressure sensor with high sensitivity
- Two-dimensional materials as bio-sensors
- Two-dimensional materials for acoustic or thermal sensing applications

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
