Next-Generation Haptic Technologies: Materials, Mechanisms, and Applications

Message from the Guest Editors

This Special Issue entitled “Next-Generation Haptic Technologies: Materials, Mechanisms, and Applications” explores groundbreaking advancements in haptic systems, focusing on their core components—materials, mechanisms, and diverse applications. With the growing demand for immersive and interactive experiences across domains like virtual reality, robotics, medical simulation, and wearable technology, the development of innovative haptic technologies is more critical than ever.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
