

## Special Issue

# 3D Images, Point Clouds and Videos Classification and Management by Means of Artificial Intelligence Approaches from Industrial to Agriculture Applications

### Message from the Guest Editors

This Special Issue addresses the latest research advances in 3D image, point cloud, and video classification. This covers a wide area of applications, such as industrial pieces recognition, crop status management, video action recognition, etc. and several techniques: machine learning, deep learning, etc. The papers will help readers to explore and share their knowledge and experience in technologies and development techniques. Basilio Sierra, Naiara Aginako and José María Martínez-Otzeta

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
