

## Special Issue

# Self-Organized Computing and Network Management for Intelligent Internet of Things

### Message from the Guest Editors

The Internet of Things (IoT) aims to enable ubiquitous wireless connections among various smart sensors, actuators and intelligent controllers, so as to integrate their functions and thereafter provide numerous novel services in both industrial and consumer domains. The goal of this Special Issue is to solicit high-quality scholarly contributions, thereby providing insights and novel solutions in areas including (but not limited to) the following:

- Novel protocols and mechanisms for self-organized access and resource management in IoTs.
- Distributed and federated learning for data processing and networked control in IoTs.
- Impact of self-organization on communication efficiency, data security and service provision in IoTs.
- Game-theoretic mechanism design incentivizing self-organization for resource-constrained IoT applications.
- Self-organized computing for wireless sensor and actuator networks.

---

### Guest Editors

Dr. Wenbo Wang

Dr. Dinh Thai Hoang

Dr. Shaohan Feng

Dr. Shimin Gong

Dr. Yingbo Huang

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
