

Special Issue

Developments in Electromagnetic Sensors

Message from the Guest Editors

The rapid growth of electromagnetic sensor technologies has revolutionized numerous industries in recent years. These sensors enable us to detect, measure, and analyze various physical and chemical properties and phenomena. Their miniaturization and enhanced capabilities have made them integral components in applications ranging from self-driving cars and smart cities to healthcare devices and environmental monitoring. With advancements in materials, signal processing, and wireless connectivity, electromagnetic sensor technologies continue to evolve, offering unprecedented accuracy, efficiency, and versatility for a wide array of innovative solutions in our increasingly interconnected world. The aim of this Special Issue is to showcase the recent advancements in the development of electromagnetic sensors.

Keywords: electromagnetic sensors; sensors; non-destructive testing; embedded sensors; environmental monitoring; healthcare sensors; modelling; wireless connectivity; remote sensing This Special Issue directly contributes to the aim and scope of *Sensors* across several research areas.

Guest Editors

Prof. Dr. Patryk Kot

Dr. Magomed Muradov

Dr. Jakub Stefan Markiewicz

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
