Indoor Positioning Technologies for Internet-of-Things: 2nd Edition

Message from the Guest Editors

Following the success of the first edition of our Special Issue entitled “Indoor Positioning Technologies for Internet-of-Things”, this second edition aims to collect outstanding and innovative research works proposing plug-n-play and calibration-free indoor positioning technologies aimed at providing users with indoor positioning functionality as a transparent and user-friendly service with complete integration into user devices. Keywords

- indoor positioning
- user experience
- RSSI
- wireless sensor networks

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
