Quantum IoT (QIoT): Revolutionizing Connectivity, Innovation, Challenges, and Applications

Message from the Guest Editors

Quantum IoT (QIoT) represents a groundbreaking integration of Quantum Computing and the Internet of Things, poised to revolutionize connectivity and drive technological innovation. By leveraging quantum technologies, QIoT can significantly enhance the efficiency, security, and scalability of IoT systems through quantum-enhanced algorithms, quantum cryptography, and advanced quantum sensors. Despite its vast potential, the implementation of QIoT faces challenges such as high research costs, infrastructure requirements, and the need for seamless integration with classical systems. This Special Issue explores the multifaceted dimensions of QIoT, presenting cutting-edge research and practical applications that highlight the transformative impact of quantum technologies on IoT. Through this collection, we aim to provide insights into the current advancements, future directions, and innovative solutions within the realm of QIoT, fostering a deeper understanding and inspiring further research in this emerging field.

Guest Editors

Dr. Javad Rezazadeh

Dr. John Ayode

Dr. Omid Ameri Sianaki

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
