

## Special Issue

# Sensors Network and Wearables for People Activities and Wellbeing Monitoring

### Message from the Guest Editors

The development of sensor networks and wearable technologies over the past years has given the possibility of extracting activities and behavioural parameters of people just using low-cost and non-invasive systems. Indeed, the gathered data can be processed with dedicated techniques, often based on artificial intelligence technologies. The monitoring of activities through non-invasive sensor networks and wearable sensors has been demonstrated to be able to depict the user's well-being, comfort, and global health status in living environments, both indoors and outdoors. In this Special Issue, we call for papers presenting innovative solutions and signal processing techniques, e.g., artificial intelligence, to measure the wellbeing and activities of people in living environments, both indoor and outdoor, through sensors network and wearable sensors. The papers should properly consider the accuracy in the measurement of such quantities.

### Guest Editors

Dr. Sara Casaccia

Department of Industrial Engineering and Mathematical Sciences,  
Università Politecnica delle Marche, v. Breccie Bianche 12, 60131  
Ancona, Italy

Dr. Gloria Cosoli

Department of Theoretical and Applied Sciences, eCampus University,  
v. Isimbardi 10, 22060 Novedrate, Italy

### Deadline for manuscript submissions

25 January 2026

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
