

Special Issue

Development and Validation of Biophotonic Sensors towards Research, Industrial and Clinical Applications

Message from the Guest Editor

This Special Issue focuses on the development and validation of novel biophotonic sensors for their targeted applications, and advances in optical techniques for next-generation devices. Contributions are invited for this Special Issue from researchers working on hardware and software development of biophotonic sensors. Topics of interest include, but are not limited to, the following:

- Validation of existing sources, light-shaping devices, detectors and data processing approaches for novel applications.
- Optimization of novel or existing software for real-time, high accuracy and/or high-throughput sample analysis.
- Investigation of new biomarkers, imaging and spectroscopy features and applications.
- Development and performance of new detectors.
- Development and performance of new sources and light-shaping devices.
- Development and performance of novel 2D or 3D imaging sensing systems.
- Development and performance of lab-on-a-chip devices.
- Development and performance of novel computational imaging approaches, including compressive sensing and machine/deep learning techniques.

Guest Editor

Dr. Marcelo Saito Nogueira
Tyndall National Institute, University College Cork, Cork, Ireland

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
