

## Special Issue

# Smart Sensing and Recognition Systems in the Construction Industry

### Message from the Guest Editor

Smart sensing and recognition systems and technologies demonstrate promising potential to provide the construction industry with a safe, productive, and high-quality process. This Special Issue of *Sensors* is dedicated to pushing the horizon of research and exploring the practical applications of smart sensing and recognition systems. The primary objective of the Special Issue is to investigate how sensor-driven or automatic recognition systems can augment and revolutionize collaborative and cooperative practices while addressing the accompanying challenges and risks. The majority of sensing or recognition technologies in the construction research area have been focused on construction automation research in relation to prefabrication, on-site operation, and logistics. With industry 4.0 and the realization of digital twins now within reach, these advancements have substantial implications for the construction industry. This Special Issue aims to bring to the forefront the ways in which new developments in sensor technologies can be applied to the construction industry.

### Guest Editor

Prof. Dr. Ren-Jye Dzung

Department of Civil Engineering, National Yang Ming Chiao Tung University, Hsinchu, Taiwan

### Deadline for manuscript submissions

closed (31 December 2024)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
