

Special Issue

Multispectral, Polarized and Unconventional Vision in Robotics

Message from the Guest Editors

Vision in robotics can benefit from unconventional techniques such as multispectral or polarization imaging, or a combination of them. This Special Issue will bring together original and innovative works on visual information extraction from imaging or non-imaging techniques including unconventional visual sensors. Method papers describing optical test benches or calibration procedures will be also accepted.

Guest Editors

Dr. Julien R Serres

Dr. Olivier Morel

Dr. Pierre-Jean Lapray

Prof. Dr. Laurent Bigué

Deadline for manuscript submissions

closed (30 June 2024)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
