Editorial Board Members' Collection

Series: Bioelectronics and Their Applications

Message from the Guest Editors

Bioelectronics are an emerging research discipline formed by the interpenetration of biology and electronic technology, and belong to key compositions of wearable electronics and implantable electronics, etc. One of the main research goals of bioelectronics is applying the theories and technologies of electronics to solve biological problems, including biological information acquisition and analysis, the development of biomedical detection technology and auxiliary treatment technology combined with nanotechnology, and the development of physiological signal monitoring equipment, etc. This Special Issue aims to gather novel developments in the design and application of bioelectronics. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
