

## Special Issue

# Internet of Vehicles— Opportunities, Challenges, and Future Prospects

### Message from the Guest Editors

The emerging and promising paradigm of the Internet of Things (IoT) has gained considerable momentum over the past two decades or so and is considered a key technological enabler for the successful realization of a number of application domains. In particular, in the context of smart cities, the recent technological breakthroughs in the IoT and vehicular ad hoc networks, and their intelligent convergence, have transformed vehicles into smart objects, thereby paving the way for the evolution of the promising paradigm of the Internet of Vehicles (IoV). Simply put, the IoV is attributed to IoT-on-wheels, wherein vehicles as formidable sensor platforms accumulate and process the flood of data to extract and subsequently broadcast meaningful safety-critical information amongst one another and in their immediate environment via vehicle-to-everything communication for guaranteeing highly reliable and intelligent traffic flows.

---

### Guest Editors

Dr. Adnan Mahmood

School of Computing, Faculty of Science & Engineering, Macquarie University, Sydney, NSW 2109, Australia

Prof. Dr. Michael Sheng

School of Computing, Faculty of Science & Engineering, Macquarie University, Sydney, NSW 2109, Australia

---

### Deadline for manuscript submissions

closed (31 October 2025)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
