

Special Issue

Signal Processing for Sensors

Message from the Guest Editors

In the last decade, we have witnessed the rapid development of sensors and an increasing number of studies on making full use of sensory data for various applications, e.g., human sensing, environment sensing, and underwater sensing. Dealing with the collected signal which bears inherent noises due to the hardware imperfections or external interference from the environment is fundamental to achieve a high-performance sensing result. Recent advances in model-driven and data-driven signal processing have made great efforts in tackling the noisy and error-prone signals. This Special Issue aims to collect original research and review articles on technologies, solutions, applications, and new challenges that are related to signal and sensory data processing. For detailed information, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
