Blockchain Integrated Internet of Things Applications

Message from the Guest Editor

The Internet of Things (IoT) is becoming an established technology, with devices being deployed in homes, workplaces, and public areas at an increasingly rapid rate. In the IoT, blockchain can be used to create a decentralized, reliable, and secure environment. In recent years, many researchers have explored the capabilities of blockchain in smart IoT to address various security challenges. Integration of IoT and blockchain solves the security problems, but scalability remains a huge challenge. This Special Issue of *Sensors* aims to bring together leading academic research results related to Blockchain Integrated IoT Applications. It also provides a platform to discuss insightful concerns as well as practical challenges encountered and solutions adopted in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
