

## Special Issue

# Optoelectronic and Functional Materials for Advanced Sensor Applications

### Message from the Guest Editor

The rapid advancement in optoelectronic materials (semiconductors, alloys, composites, engineered heterostructures) and the development of novel heterostructures have significantly expanded the landscape of modern sensing technologies, enhanced sensitivity, selectivity, stability, and multifunctionality. These advancements are pivotal for diverse applications such as environmental monitoring, biomedical diagnostics, chemical detection, energy harvesting, and industrial automation. This Special Issue aims to highlight state-of-the-art research in optoelectronic materials and heterostructures designed for cutting-edge sensor technologies. We invite original studies, reviews, and perspectives on novel heterojunction designs, composite-based sensing platforms, fabrication techniques, mechanism modeling, and application-specific developments. Topics include but not limited to:

- Optoelectronic semiconductors and alloys for sensors;
- Design and synthesis of novel heterostructures and heterojunctions;
- Performance optimization and stability enhancement of optoelectronic sensors, etc.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
