# **Special Issue**

# High-Resolution Guided-Wave Optical Sensors

## Message from the Guest Editor

Guided-wave optical sensors (GWOSs) have become one of the most active research areas in the field of sensors. GWOSs encompass a wide range of modalities, including fiber sensors, optical waveguide sensors, microresonators, nanophotonic sensors. plasmonic sensors, microfluidics, etc. A common theme across all these different fields of research is the pursuit of ever-decreasing signal levels or, in other words, higher resolutions. Such an effort is often met with fundamental limitations, such as thermal noises and plasmonic losses, as well as technological challenges, such as restrictions caused by material properties and fabrication capabilities. Understanding, mitigating, and overcoming these limitations and challenges will lead to breakthroughs in sensor resolutions and open up even broader applications. The topical areas of Special Issue include but are not limited to:

- Fiber-optic sensors;
- Si nanophotonic sensors;
- Sensors based on microresonators;
- Plasmonic sensors;
- Photonic crystal sensors;
- Metamaterial sensors;
- Microfluidic sensors.

## **About the Journal**

## Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

#### Editor-in-Chief

#### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

## **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
