Biomedical Signal Processing and Health Monitoring Based on Sensors

Message from the Guest Editors

The healthcare industry is growing at a rapid pace with the development of IoT technology. The global epidemic of COVID-19, an aging population, and an increase of chronic diseases are accelerating the development of various IoT services related to health monitoring. The paradigm of global healthcare is shifting from diagnosis and treatment to prevention, prediction, and personalization. The need for health care that can prevent and manage diseases is increasing, and sensor based IoT technology for this is evaluated as a key technology for health monitoring. The goal of this Special Issue is to collect original contributions or critical reviews focusing on monitoring and predicting health conditions or diseases through biomedical signal processing based on sensors. The topics include, but are not limited to, biomedical signal processing algorithm, feature extraction and interpretation, sensor system, and artificial intelligence algorithms for health monitoring.

Guest Editors

Dr. Sang Ho Choi

Prof. Dr. Heenam Yoon

Prof. Dr. Hyun Jae Baek

Dr. Xi Long

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
