

Special Issue

Advanced Sensing and Signal Processing for Radar Imaging, Target Recognition and Object Detection

Message from the Guest Editor

Radar plays an important role in information acquisition and has been widely used in military and civilian areas. However, with the development of advanced signal processing techniques, the existing algorithms have difficulty meeting the requirements of radar systems. This topic aims to explore the application of advanced technology in object detection, target recognition and imaging based on radar, and seeks novel ideas to improve radar performance. Articles on theoretical, application-oriented, and experimental studies with an emphasis on novelty in radar signal processing are considered. As a result, the aim of this new initiative is to bring together researchers working in the fields of radar and remote sensing. It is our desire to provide novel insights into the application of advanced signal processing techniques to radar systems. For more details, please visit [here](#).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
