

Special Issue

Innovative Sensors and Embedded Sensor Systems for Food Analysis

Message from the Guest Editor

The editors welcome the submission of high-quality research papers (not previously published in other journals) as well as review articles discussing recent advancements in the development of embedded sensor systems for food analysis and innovative techniques associated with food analysis that can be easily implemented in the form of an electronic embedded system. Keywords

- sensors
- food analysis
- embedded sensor systems
- biosensors
- sensor networks
- sensing techniques (electrical impedance spectroscopy, absorbance spectroscopy, fluorescence spectroscopy, and computer vision)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
