

## Special Issue

# Innovations of Chemical/Gas Sensor Application in Nanoengineering

### Message from the Guest Editor

Among the important areas of research in nanoengineering are the development of chemical and gas sensors with high sensitivity, selectivity, and reliability. The topic of "Innovations of Chemical/Gas Sensor Application in Nanoengineering" can fit within several areas of the scope list related as: Lab-on-a-chip; Remote sensors; Sensor networks; Smart/Intelligent sensors; Sensor devices; Sensor technology and application; Sensing principles; Optoelectronic and photonic sensors; Sensor arrays and Chemometrics; Micro and nanosensors; MEMS/NEMS. For detailed information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
