

Special Issue

ICT Technologies for Sport Sciences

Message from the Guest Editor

This Special Issue aims to publish new and novel research work focusing on the latest advances in ICT technologies for sport science. Major sub-topics include sensors and measurement systems to evaluate physical qualities, the analysis of technical gestures and the improvement of sports performance. It is our pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

- wearable sensor
- IMU
- machine learning
- sports performance
- computer vision
- physical qualities

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
