

Special Issue

Emerging Machine Learning Techniques in Industrial Internet of Things

Message from the Guest Editors

This Special Issue wishes to solicit state-of-the-art research or works in progress on emerging machine learning techniques. Potential topics include, but are not limited to, lightweight deep neural network models, neural network compression techniques, machine learning with knowledge engineering, data encryptions, data privacy preserving techniques, federated learning, knowledge distillation, and transfer learning. In addition, we welcome original research articles covering new IIOT applications, case studies, challenges and developments in IIoT, as well as theoretical works in making light-weight deep neural networks. We also intend to include research works on computing technologies in support of IIOT facilities such as fog computing, edge computing, computation offloading, and hybrid edge-fog-cloud computing in this Special Issue.

- industrial Internet of Things
- computation efficient machine learning
- federated learning
- knowledge distillation
- edge computing
- data privacy preserving
- machine learning robustness

Guest Editors

Prof. Dr. Maozhen Li

Dr. Zhengwen Huang

Dr. Yang Liu

Prof. Dr. Mukhtaj Khan

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
