Special Issue

Recent Innovations in Eletromagnetic-Wave Absorbers in Sensing Area

Message from the Guest Editor

Electromagnetic wave absorbers not only play a very active roles in the prevention and control of electromagnetic radiation pollution and interference, but they also represent a key component to realizing electromagnetic stealth. At present, great efforts have recently been made to develop an electromagnetic wave absorber that meets the requirements of being thin (thin layer), light (light weight) and wide (absorption frequency bandwidth), having a strong (strong absorption rate) performance, while also maintaining a simple manufacturing process. Moreover, the multi-functional absorbing performance is the frontier of electromagnetic wave absorber research. Topics of interest include, but are not limited to: (1) Broadband and multiband electromagnetic wave absorbers; (2) Partially transmissive and reflective electromagnetic wave absorbers; (3) Active frequency-selective absorbers; (4) High-power electromagnetic wave absorbers; (5) Materials for electromagnetic wave absorbers; (6) Theory and new applications of electromagnetic wave absorbers

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
