Advanced Magnetic and Fluorescent Nanomaterial Sensors: Design, Development, and Application

Message from the Guest Editors

Magnetic and fluorescent nanomaterials represent transformative tools used in sensing technologies, enabling unprecedented sensitivity, selectivity, and versatility across various applications. This Special Issue, titled *Advanced Magnetic and Fluorescent Nanomaterial Sensors: Design, Development, and Application*, invites cutting-edge research on the synthesis, characterization, and integration of these nanomaterials into advanced sensing systems. Key topics include innovative fabrication methods, surface modification strategies, hybrid sensor designs, and real-world applications spanning healthcare, environmental monitoring, and industrial diagnostics. By highlighting multidisciplinary approaches that bring together chemistry, material science, and engineering, this Special Issue will inspire new avenues of exploration and collaboration, advancing the field toward scalable, real-time, and ultra-sensitive sensors with broad applicability.

Guest Editors

Dr. He Wei

Department of Chemistry and Biochemistry Faculty, California State University, Fresno, CA 93740, USA

Dr. Shuo Wu

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
