

Special Issue

Advanced Sensing for Connected and Automated Mobilities

Message from the Guest Editors

This Special Issue aims to comprehensively explore the recent advancements in Advanced Sensing Technologies crucial for the progression of autonomous driving, encompassing topics such as Physical and Digital Infrastructure, AI, Deep Learning, Cooperative Fusion, and HD Maps. As autonomous vehicle technologies evolve, the pivotal role of advanced sensing becomes increasingly apparent, particularly in enhancing safety, perception, and overall system reliability. Addressing challenges posed by factors such as interferences, weather conditions, and the limited field of view in existing sensor technologies, the Special Issue seeks innovative solutions by integrating advanced sensors. Keywords encompass sensor fusion, sensor processing, multi-sensor integration, environmental perception, autonomous driving, Advanced Sensor Technologies, Physical Infrastructure, Digital Infrastructure, AI, Deep Learning, Cooperative Fusion, and HD Maps. Contributions in these areas are encouraged to propel the field towards a future of intelligent, reliable, and context-aware autonomous driving. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
