

## Special Issue

# Novel Sensors for Structural Health Monitoring: 2nd Edition

### Message from the Guest Editor

This Special Issue is a continuation of our previous Special Issue titled “Novel Sensors for Structural Health Monitoring”. In recent years, many researchers have developed novel sensors driven by the growth in sensing technologies combined with the easier access to data acquisition, processing, and storage systems. Among other advantages, these solutions have the ability to be flexible, as they can be customized and adapted to each specific case under study. This Special Issue is dedicated to the dissemination of research work in this area, with a special focus on problems involving the health monitoring of different types of structures.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
