# Smart Assistive Technologies for Special Individuals: Enhancing Accessibility and Independence

### Message from the Guest Editor

This Special Issue aims to explore the latest developments, applications, and challenges in the field of smart assistive technologies for special individuals.

### Topics of Interest

- Innovative wearable devices and smart sensors for personalized assistance.
- Multimodal integration of information in assistive technologies.
- Adaptive communication devices and speech recognition systems.
- Assistive robotics for daily tasks and social interaction.
- IoT-based solutions for home automation and environmental control.
- Smart navigation systems for indoor and outdoor mobility.
- Augmented reality (AR) and virtual reality (VR) applications for accessibility.
- Accessible user interfaces and inclusive design principles.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
