Sensing Platform for Smart Cities

Message from the Guest Editors

The "Sensing Platform for Smart Cities" is a cutting-edge technology that leverages Artificial Intelligence (AI), data analytics, blockchain technology, and advanced communication systems like 5G and 6G to revolutionize urban environments. By deploying interconnected sensors throughout the city, this platform accumulates real-time data on different parameters such as air quality, noise levels, temperature, and traffic flow. This data is then studied using AI and data analytics procedures to provide valuable insights for decision-making. Here is list of most relevant keywords Smart Cities, Artificial Intelligence, Data Analytics, Blockchain technology, Smart Transportation, Smart healthcare, Smart Energy Grids, 5G and 6G Communication

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
